

The ADSR Project for me is a great and wonderful idea. The people who conceived it and designed it did a great job.

This project is what Africa needs and I am sure many other regions could benefit from it as well.

As an individual, I had really a very nice experience. I had fun in Jamaica but the bigger picture is that we have learned a lot and are taking it back to our respective countries. I believe that this project has offered us so many opportunities that we would have not had before. Very few African countries can afford to send their trained personnel to Jamaica for two months, fully paid. Such a trade-off cannot be done. So through the ADSR project, we as individuals and experts, have been given a tremendous opportunity to strengthen the expertise of our countries and to be further trained, to gain skills and knowledge and share it when we return.

GERALD MWILA

Senior Geologist – Economic Geology, Government of the Republic of Zambia

ADSR EXPERT 2021

- *Country: Zambia*
- *Education: MSc. TropHEE, Technical University of Darmstadt*
Post graduate Diploma in GIS, Technische Fachhochschule
BMinSc in Geology from University of Zambia
- *Languages: English, Icibemba and basic German*
- *Hobbies: Playing Chess, watching movies, reading, making friends and having a beer*
