Permanent Representativ

Embassy and Permanent Mission

of Costa Rica

Kingston, Jamaica

Strategic direction 3:

Ammend par 13. "The performance of the Authority in achieving this goal will be assesed through its capacity to develop, implement and keep under review RRP based on best available science, the precautionary principle and best environmental practices, for an environmentally responsible management of activities in the area that will ensure the effective protection of the marine environment and related obligations in Articles145 and 194.5 of the Convention, as well as the development of associated environmental standards and guidelines."

Ammend performance indicator 3.1

"Development, implementation and review of RRP based on best available science, the precautionary principle and best environmental practices, for an environmentally responsible management of activities in the area that will ensure the effective protection of the marine environment and related obligations in Articles145 and 194.5 of the Convention, as well as the development of associated environmental standards and guidelines."

Strategic direction 4, add performance indicator:

4.4 "Promote marine scientific research directed to providing the scientific knowledge necessary to be able to ensure the effective protection of the marine environment and related obligations in the Convention, including through regional environment management plans".

Strategic direction 9, add performance indicator:

9.5" Measures taken by the authority to make publicly available the contracts, contractors annual reports, and related environmental information, including the impact assessments associated with applications for plans of work."
