

WORKSHOP ANNOUNCEMENT

The International Seabed Authority, Interoceanmetal Joint Organization (IOM) and the Ministry of the Environment in Poland are jointly organizing a workshop on *Processing Technologies, Metal Recoveries & Economic Feasibility of Deep Sea Mining* at the Ministry of Environment in Warsaw, Poland 3-6 September, 2018.

The workshop will be focused on the following core areas: **P**rocessing technologies (metal recovery); **E**conomic feasibility of mining seabed minerals; **I**mpact of seabed mining on terrestrial mineral supplies; **E**nvironment – clean marine technology, waste disposal and recycling; **I**nternational cooperation, regulations and role of the ISA as regulator.

The Authority is inviting stakeholders and in particular, contractors holding exploration contracts, to participate in the workshop.

With a limited number of available places, interested persons are required to register by submitting a letter of interest to the Authority by **3 August 2018**.

The agenda will be posted on ISA's website in due course.

For further information, please contact: Dr. Pratima Jauhari (pjauhari@isa.org.im)/Dr. Sandor Mulsow (smulsow@isa.org.im) and/or Ms. Shanique Gregory (sgregory@isa.org.im).
