

**Draft standard and guidelines on the form and calculation of an
Environmental Performance Guarantee
developed by the Legal and Technical Commission**

**DRAFT FOR STAKEHOLDERS CONSULTATION
(DO NOT QUOTE OR CITE)**

Background

1. At the second part of its twenty-sixth session, the Commission considered draft standards and guidelines on the form and calculation of an environmental performance guarantee for the application of Draft regulation 26 of the Draft regulations on exploitation of mineral resources in the Area (ISBA/25/C/WP.1) on the basis of a document prepared by the secretariat with the assistance of a consultant.
2. Draft regulation 26 requires a contractor to lodge an environmental performance guarantee in favour of the Authority no later than the commencement date of production in the Mining Area. The required form and amount of such a guarantee are to be determined according to guidelines, and shall reflect the likely costs required for: (a) the premature closure of exploitation activities; (b) the decommissioning and final closure of exploitation activities, including the removal of any Installations and equipment; and (c) the post-closure monitoring and management of residual environmental effects.
3. The Commission considered that a balanced approach should be taken between environmental concerns and the need to ensure the development of activities in the Area. Such balance includes: 1) ensuring that the form and amount of the environmental performance guarantee do not hinder the ability of contractors to participate in activities in the Area; and 2) ensuring that the Authority has the full amounts required to cover the costs of the events identified in the scope of Draft regulation 26.
4. Accordingly, the Commission considered that the standard (Appendix I) and guidelines (Appendix II) should adopt a flexible approach to the form and calculation of the environmental performance guarantee, allowing the contractor to 1) select from a variety of forms of financial security, as long as the maximum financial security required to meet any of the events foreseen in Draft regulation 26(2) is ensured; and 2) utilize a method of calculation that is robust enough for estimating to the fullest extent reasonable costs, expenses and liabilities. A key consideration, however, is that the calculation and cost estimation are validated independently and the form and calculation are approved by the Council.

I. INTRODUCTION

1. Regulation 26 of the Exploitation Regulations requires a Contractor to provide an Environmental Performance Guarantee ("**Guarantee**") in favour of the Authority to meet the likely costs, expenses and liabilities that may result from either:

- (a) the premature closure of Exploitation activities;
- (b) the decommissioning and final closure of Exploitation activities, including the removal of any Installations and equipment; and
- (c) the post-closure monitoring and management of residual Environmental Effects (together the "**EPG Scope**").

2. In accordance with the Exploitation Regulations, an Applicant for approval of a Plan of Work shall provide details of its proposed Environmental Performance Guarantee as part of its application to be considered by the Commission and the Council.

3. An Applicant shall satisfy the Commission that it will meet the obligations under Regulation 26 by:

- (a) adopting an independently validated method and calculation for 100% of the costs, expenses and liabilities of the EPG Scope; and
- (b) submitting, in the prescribed form, both an Environmental Performance Guarantee Declaration and an Environmental Performance Guarantee Confirmation to the Commission.

4. The Applicant shall calculate the costs, expenses and liabilities on a third-party basis, meaning the calculation shall assume the works and activities within the EPG Scope are carried out by a third-party rather than a Contractor.

5. If the Applicant's EPG proposal and Plan of Work are approved by the Council, the Applicant (as the Contractor) shall lodge its Guarantee with the Authority no later than the date on which production in the approved Mining Area commences.

6. At all times, the Contractor shall:

- (a) maintain a sufficient guarantee for the life of the Exploitation Contract, and in some circumstances, at the sole discretion of the Authority, beyond the terms of the Exploitation Contract;
- (b) ensure the Authority, if required, can access the guarantee to meet the costs, expenses and liabilities of the EPG scope; and
- (c) remain fully responsible and liable under the Exploitation Regulations for the Contractor's obligations under the Exploitation Contract and approved Plan of Work regardless of any Guarantee provided to the Authority.

67 **II. SCOPE**

68 **A. Purpose**

69 7. This Standard describes how the Authority will administer the requirement for an
70 Environmental Performance Guarantee.

71 8. This Standard explains:

72 (a) the process an Applicant shall follow to demonstrate to the Commission that it has
73 proposed an adequate and appropriate Environmental Performance Guarantee, including:

74 (i) identifying appropriate form(s) of guarantees;

75 (ii) the requirement for an independently validated method to calculate the
76 greatest reasonably credible costs, expenses and liabilities associated with the EPG
77 Scope;

78 (iii) filing an Environmental Performance Guarantee Declaration with the
79 Authority; and

80 (iv) submitting an Environmental Performance Guarantee Confirmation with
81 the Authority prior to the lodgment of the guarantee.

82 (b) the process for review and re-validation of the Environmental Performance
83 Guarantee; and

84 (c) the process for repayment or release of the Environmental Performance Guarantee.

85 9. This Standard should be read in conjunction with the equivalent sections in the
86 Guidelines

87 **B. Definitions**

88 10. Except as otherwise specified herein, terms and phrases defined in the Exploitation
89 Regulations shall have the same meaning in this Standard.

90 **III. EXPLOITATION REGULATION REQUIREMENTS RELEVANT TO THE**
91 **ENVIRONMENTAL PERFORMANCE GUARANTEE**

92 **A. Requirement to meet costs, expenses and liabilities**

93 11. The Guarantee is required to cover unexpected costs, expenses and liabilities that a
94 Contractor is unable to meet that fall within the EPG Scope.

95 12. The Guarantee is not to cover ordinary and foreseen operating costs, such as the costs
96 of compliance with conditions of the Exploitation Contract or tortious liability for
97 environmental damage.

98 13. An Applicant or Contractor shall estimate costs, expenses and liabilities that may arise
99 in respect of the items listed in Regulation 26(2)(a)-(c) on a third-party basis, which shall be

100 estimated by the Applicant or Contractor in a conservative manner, assuming the highest
101 reasonable cost for each item.

102 14. Liabilities are considered to include reasonably estimable costs, such as third-party
103 costs associated with satisfying the conditions of the Contractor's Closure Plan, and
104 undertaking post-closure monitoring and management of residual Environmental Effects.

105 **B. Forms of the Environmental Performance Guarantee**

106 15. Recommendations for the form of the Guarantee are set out in the Guidelines. Changes
107 to the form of a guarantee following approval of a Plan of Work shall require the consent of
108 all parties involved and shall be approved by the Council.

109 **IV. HOW TO DEMONSTRATE A SUFFICIENT GUARANTEE**

110 **A. A proposed Guarantee is a condition for approval of a Plan of Work**

111 16. In accordance with the Regulations, a proposal for an EPG must be part of an
112 application for approval of a Plan of Work.

113 17. An Applicant for approval of a Plan of Work shall prepare a Plan of Work that includes
114 details of the proposed Guarantee, including:

- 115 (a) the proposed form of the Guarantee;
- 116 (b) the calculation of the Guarantee; and
- 117 (c) the Guarantee's terms and conditions.

118 18. An Applicant shall propose a Guarantee in a form acceptable to the Commission by:

- 119 (a) adopting the endorsed method for estimating the greatest reasonably credible third-
120 party costs, expenses and liabilities based on the Applicant's Closure Plan;
- 121 (b) using an accepted calculation tool for calculating the third-party costs, expenses
122 and liabilities that may arise from the Applicant's Closure Plan;
- 123 (c) producing a Validation Statement prepared and signed by an independent
124 validator(s), confirming that the form and calculation adopted by the Applicant is accurate;
125 and
- 126 (d) submitting in the prescribed form, an Environmental Performance Guarantee
127 Declaration and an Environmental Performance Guarantee Confirmation to the
128 Commission;

129 **B. How to determine the form of the Guarantee**

130 19. An Applicant or Contractor shall identify the form(s) of Guarantee that will be offered
131 for consideration by the Commission.

132 **C. How to calculate the Guarantee**

133 20. An Applicant or Contractor shall use a suitably robust cost estimation tool for
134 calculating the greatest reasonably credible costs, expenses and liabilities that may arise
135 from the items listed in Regulation 26(2)(a)-(c).

136 21. An Applicant or Contractor shall select a cost estimation tool for estimating the greatest
137 reasonably credible costs, expenses and liabilities that are appropriate for the completion of
138 its Closure Plan under the proposed Plan of Work. The "greatest reasonably credible costs"
139 is an objective standard by which the Authority and Contractors can determine the extent of

140 the guarantee required. The Applicant or Contractor shall estimate the greatest reasonably
141 credible costs on a "worst case scenario" basis.

142 22. A Guarantee is required for all non-contiguous Mining Areas to which a Plan of Work
143 relates.

144 23. If an Applicant has proposed two or more non-contiguous Mining Areas in its Plan of
145 Work and the Commission has approved the Applicant relying on a single set of documents
146 in accordance with Regulation 7(4), the Applicant shall:

147 (a) estimate the greatest reasonably credible costs, expenses and liabilities that may
148 arise from all Closure Plans across all Mining Areas; and

149 (b) produce the one form and calculation of financial guarantee for consideration by
150 the Commission.

151 24. If:

152 (a) the Applicant submits one form and calculation of financial guarantee pursuant to
153 paragraph 19 of the Guidelines; and

154 (b) the Commission subsequently requires that separate documents are required under
155 Regulation 7(4),

156 the Applicant shall submit separate forms and calculations of Guarantees for each non-
157 contiguous Mining Areas in accordance with the Regulations and these Standards.

158 **D. Requirement for an independent Validation Statement**

159 25. An Applicant or Contractor shall independently validate the form and calculation of the
160 proposed Guarantee and produce a Validation Statement prepared and signed by an
161 independent validator(s), confirming that the form and calculation adopted by the Applicant
162 or Contractor is accurate.

163 26. An independent validator(s) appointed by an Applicant or Contractor shall be:

164 (a) competent and independent; and

165 (b) required to submit a statement of independence with their Validation Statement.

166 27. The Validation Statement shall include:

167 (a) a statement of the validator's qualifications and experience;

168 (b) a statement of the validator's independence vis-à-vis the Applicant or Contractor;

169 (c) concise explanations of the validation method used by the validator and the method
170 that the Applicant or Contractor has used to calculate the amount of Guarantee required; and

171 (d) confirmation that the calculation method adopted by the Applicant or Contractor is
172 sensitive to the economic, geological, environmental and geographic features of the project.

173 28. An Applicant or Contractor shall produce the Validation Statement to the Commission
174 at the time of submitting the proposed Guarantee.

175 **E. Environmental Performance Guarantee Declaration**

176 29. The Commission has developed an Environmental Performance Guarantee Declaration
177 Form

178 30. An Applicant when proposing its Guarantee to the Commission shall also include a
179 completed Environmental Performance Guarantee Declaration.

180 31. The Declaration requires the Applicant to certify that it:

181 (a) is and will remain compliant for the duration of the Exploitation Contract with the
182 Exploitation Regulations, including Regulation 26; and

183 (b) formally acknowledges its legal duty to maintain and make accessible the approved
184 Guarantee over the life of the Exploitation Contract.

185 32. The Commission requires the Declaration be provided prior to or at the time of
186 submission of an application for a Plan of Work.

187 33. An Applicant shall ensure that valid declarations are in place for all Plans of Work to
188 which a Guarantee relates prior to submitting the proposed Guarantee to the Commission.

189 **F. Environmental Performance Guarantee Confirmation**

190 34. The Commission has developed an Environmental Performance Guarantee
191 Confirmation Form

192 35. A Contractor when lodging the Guarantee in accordance with Regulation 26(2) shall
193 also submit an Environmental Performance Guarantee Confirmation to the Commission
194 attesting that a Guarantee in the form approved by the Council has been lodged in favour of
195 the Authority.

196 36. The Confirmation requires the Contractor to certify that:

197 (a) a validated cost estimation tool was used to estimate the reasonably identifiable
198 and estimable costs, expenses and liabilities required under Regulation 26(2);

199 (b) the cost estimation tool used was appropriate for the nature and scale of impacts
200 that might arise under the Closure Plan and the Guarantee conforms to the Authority's
201 endorsed method; and

202 (c) The approved Guarantee contained within the Plan of Work has been lodged with
203 the Authority.

204 37. The Contractor shall lodge an updated Confirmation if there is a Material Change to the
205 approved Plan of Work, including the Guarantee.

206 **G. Environmental Performance Guarantee for multiple Contractors**

207 38. The Commission acknowledges that in some circumstances there will be more than one
208 individual or entity registered as the Contractor for a Mining Area.

209 39. Where a partnership or consortium of entities submits an application for approval of a
210 Plan of Work (**Group or Consortium**), the Environmental Performance Guarantee

211 Declaration Form provides that each member of the Group or Consortium shall submit a
212 Declaration that it will comply with the requirements of Regulation 26.

213 40. In the submission of a Plan of Work, the lead member of the Group or Consortium
214 shall:

215 (a) calculate the level of the Guarantee required by the Group or Consortium to meet
216 the obligations contained in Regulations 26 for the proposed Plan of Work in accordance
217 with these Standards

218 (b) confirm to the Commission that the Group or Consortium (as opposed to the
219 members of that Group or Consortium) holds or will hold a sufficient Guarantee for the
220 duration of the Plan of Work;

221 (c) confirm to the Commission that the form(s) of the Guarantee the Group or
222 Consortium hold will be immediately accessible by the Authority at the point where costs,
223 expenses and liabilities arise and are unable to be met under the Closure Plan;

224 (d) inform all other members of the Group or Consortium for the proposed Plan of
225 Work of the total amount of the Guarantee to be held;

226 (e) confirm with all other members of the Group or Consortium for the proposed Plan
227 of Work that the lead member has submitted all Declarations to the Commission for the
228 relevant Application; and

229 (f) provide an Environmental Performance Guarantee Confirmation to the Authority
230 on lodgment of the Guarantee.

231 41. All other members of the Group or Consortium for the Plan of Work shall:

232 (a) confirm to the Commission that the Group or Consortium holds or will hold a
233 sufficient Guarantee for its Plan of Work;

234 (b) confirm to the Commission that the form(s) of the Guarantee the Group or
235 Consortium
236 holds or will hold will be immediately accessible by the Authority at the point where costs,
237 expenses and liabilities arise and are unable to be met under the Closure Plan; and

238 (c) inform the lead member of the Consortium or Group that an Environmental
239 Performance Guarantee Confirmation has been provided to the Commission.

240 42. The Group or Consortium shall provide a proposal for, and hold, a Guarantee for its
241 Plan of Work in the name of the Group or Consortium, or in the name of one individual
242 member of the Group or Consortium.

243 **V. ONGOING RESPONSIBILITIES**

244 43. The Contractor is at all times responsible for maintaining the form and amount of the
245 approved Guarantee.

246 44. This responsibility cannot be discharged by affiliates, related companies, sub-
247 contractors or other entities who are not the Contractor, for the purposes of the Exploitation
248 Regulations.

249 **VI. REVIEW OF A GUARANTEE**

250 *[Clarifications to the review mechanism should be made to Regulation 26(6). In this case,*
251 *this section is a placeholder.]*

252 **VII. REPAYMENT OR RELEASE OF A GUARANTEE**

253 45. The Contractor's closure obligations are set out in the Exploitation Regulations.

254 **A. Release in full**

255 46. The entire Guarantee shall be released:

256 (a) where:

257 (i) all of the requirements of the Closure Plan that include likely costs required
258 for the EPG Scope have been fulfilled; and

259 (ii) the Commission has approved the final performance assessment under
260 Regulation 61(3); or

261 (b) where the:

262 (i) Council has approved the transfer of rights and obligations under an
263 Exploitation contract under Regulation 23; and

264 (ii) new Contractor (transferee) has deposited a Guarantee in accordance with
265 Regulation 26; or

266 (c) where:

267 (i) there is a change of control under Regulation 24;

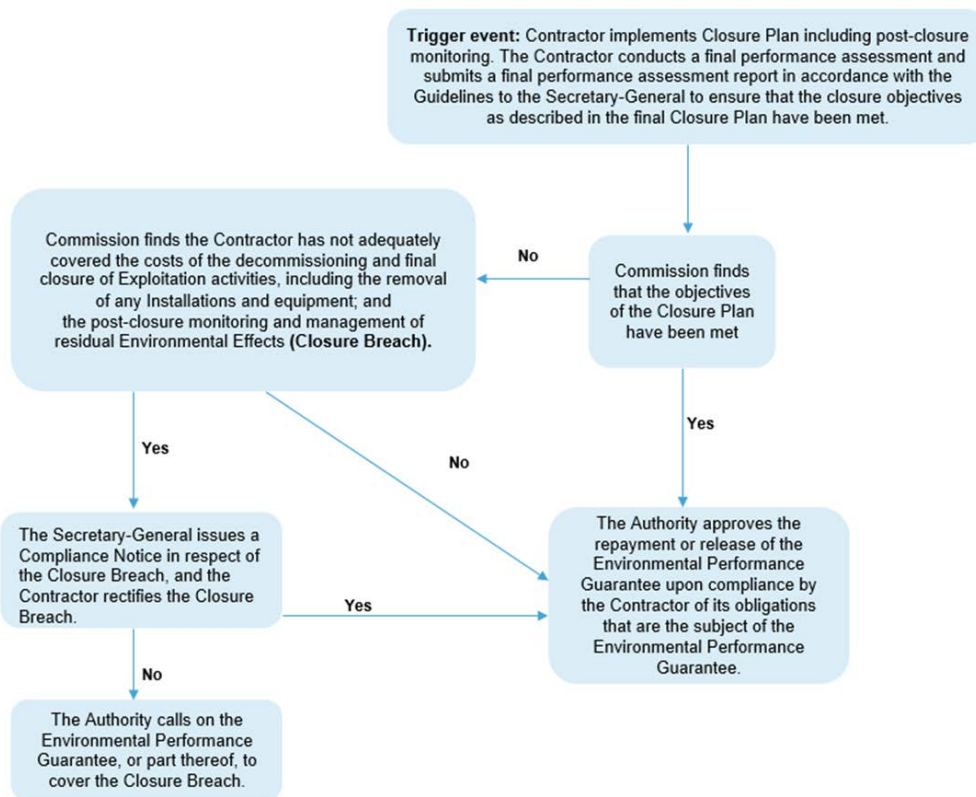

268 (ii) the Secretary-General has required that the Contractor lodge a new
269 Guarantee under Regulation 24(3)(c); and

270 (iii) the Contractor has lodged a new Guarantee in accordance with Regulation
271 24(3)(c).

272
273

47. Figure 2 indicates the release process of a Guarantee under the Exploitation Regulations pursuant to paragraph 46:

Figure 2: A simplified flowchart of the Environmental Performance Guarantee release process

274
275

B. Release in part

276
277

48. Subject to paragraphs 48 and 49, part of the Guarantee may be released, upon the Contractor's request, where the:

278

(a) Council has approved a final Closure Plan under Regulation 60; and

279

(b) The Contractor has implemented the final Closure Plan in accordance with the conditions of its implementation, and reported the results on the progress of such implementation to the Secretary General in accordance with Regulation 61(1); and

280

281

(c) the implementation of the final Closure Plan has removed any risk of liability in respect of costs relating to the items prescribed in Regulation 26(2)(a) and (b).

282

283

49. Where a Contractor has requested partial release of its Guarantee, the Commission shall, subject to paragraph 48, either:

284

(a) recommend to the Council to release the part of the Guarantee as requested; or

285

(b) notify the Contractor that it will recommend to the Council that the requested Guarantee should not be released, the reasons why, and the measures necessary to satisfy the requirements of the Closure Plan.

286

287

50. Where part of the Guarantee shall be released in accordance with paragraphs 48 and 49, the Commission shall make a recommendation to the Council in respect of the amount of the Guarantee that shall be repaid or released.

288

289

51. Where:

290

291

292

293

- 294 (a) the Contractor has failed to implement a Closure Plan; and
295 (b) the Contractor has failed to meet any costs in respect of any of the items listed in
296 Regulation 26(2); and
297 (c) the Authority has implemented the Closure Plan and covered outstanding costs
298 relating to the items listed in Regulation 26(2),
299 the Authority will release any remaining part of the Guarantee to the Contractor.

300 **VIII. RELEVANT DOCUMENTS**

301 (*[hyperlinks to relevant documents here]*)

302 **IX. FORMS**

303 (*[hyperlinks to relevant forms here]*)

304 **X. DEFINITIONS AND ABBREVIATIONS**

305

306 **52. Environmental Performance Guarantee Declaration** means the declaration
307 prescribed by Section IV (e) of the Standards.

308 **53. Environmental Performance Guarantee Confirmation** means the confirmation
309 prescribed by Section IV (f) of the Standards.

310
311 **54. EPG** means the Environmental Performance Guarantee

312
313 **55. Group or Consortium** means a partnership or consortium of entities that submit an
314 application for approval of a Plan of Work.

315
316 **56. Guarantee** means the Environmental Performance Guarantee.

IV. Definitions

337

338

339

340

341

I. SCOPE

342

A. Purpose

343

1. Regulation 26 of the Exploitation Regulations requires a Contractor to provide an Environmental Performance Guarantee ("**Guarantee**") in favour of the Authority to meet the likely costs, expenses and liabilities that may result from either:

344

345

346

(a) the premature closure of Exploitation activities;

347

(b) the decommissioning and final closure of Exploitation activities, including the removal of any Installations and equipment; and

348

349

(c) the post-closure monitoring and management of residual Environmental Effects (together, the "**EPG Scope**").

350

351

2. The Standard describes how the Authority will administer the requirement for an Environmental Performance Guarantee. The Standard explains:

352

353

(d) how an Applicant may establish compliance with the Exploitation Regulations when submitting an Environmental Performance Guarantee proposal to the Commission as part of an application for approval of a Plan of Work;

354

355

356

(e) how a Contractor may establish compliance with the Exploitation Regulations during reviews, updates and release of the Environmental Performance Guarantee;

357

358

(f) the process for review and re-validation of the Environmental Performance Guarantee; and

359

360

(g) the process for repayment or release of the Environmental Performance Guarantee.

361

3. These Guidelines support the implementation of the Standard and the Exploitation Regulations.

362

363

4. Sections of these Guidelines should be read in conjunction with equivalent sections in the Standards.

364

365

B. Definitions

366

5. Except as otherwise specified herein, terms and phrases defined in the Exploitation Regulations have the same meaning in these Guidelines.

367

368

II. EXPLOITATION REGULATION REQUIREMENTS RELEVANT TO THE ENVIRONMENTAL PERFORMANCE GUARANTEE

369

370

A. Forms of the Environmental Performance Guarantee

371

6. An Applicant or Contractor may use its discretion to determine the form (or combination of forms) for its specific requirements under its Plan of Work and Closure Plan, provided the form of the Guarantee:

372

373

374

(h) covers 100% of the total estimated cost required to satisfy Regulation 26(2)(a)-(c); and

375

376

(i) is calculated and independently verified on a third-party cost basis.

377 7. The following non-exhaustive forms of guarantees may be proposed by an Applicant or
378 Contractor pursuant to Regulation 26(2).

379 *Self-guarantee or company guarantee*

380 8. A self-guarantee – also known as a "company guarantee", "*corporate financial test*", or
381 a "*balance sheet test*" – is based on an evaluation of the assets and liabilities of the
382 Applicant/Contractor and its ability to pay the total rehabilitation and closure costs. A self-
383 guarantee or company guarantee requires a history of financial stability, a favorable credit
384 rating from a specialised credit rating service, and the provision of an annual financial
385 statement prepared by a reputable international accounting firm.

386 *Insurance Policy or Scheme*

387 9. From funds deposited, the insurer issues the required security bonds to the Authority
388 and pays the actual costs of the items listed in Regulation 26(2)(a)-(c). At the end of project
389 life, if there is a surplus in the account, it is remitted to the Contractor; if there is a deficit,
390 the insurer pays.

391 *Letter of Credit/Bank Guarantee*

392 10. An irrevocable letter of credit, also known as a "*bank guarantee*", is an unconditional
393 agreement between a bank and a proponent to provide funds to a third party on demand. In
394 this instance, the third party is the Authority and the proponent is the Contractor. A letter
395 of credit or bank guarantee will include the terms and conditions of the agreement between
396 the Contractor and the Authority, with reference to the Closure Plan and the agreed-upon
397 costs to pay for the items listed in Regulation 26(2)(a)-(c). Any changes to the letter of
398 credit or bank guarantee requires the consent of the issuing bank, the Applicant/Contractor,
399 and the Authority.

400 *Insurance Guarantee*

401 11. An insurance guarantee or bond is an agreement between an insurance company and a
402 Contractor to provide funds to a third party under certain circumstances. In this instance, the
403 third party is the Authority. An insurance guarantee includes the terms and conditions of the
404 agreement between the Contractor and the Authority with reference to the Closure Plan,
405 agreed-upon costs, and conditions for the release of the bond. Any changes to an insurance
406 guarantee require the consent of all the parties involved.

407 *Cash Deposits*

408 12. A deposit can be made for a financial guarantee such as cash, a bank draft, or a certified
409 cheque. The funds should be placed in a dedicated account under the management of the
410 financial institution, with the Authority and Contractor holding joint signatory powers.
411 Alternatively, the cash may be used to purchase a certificate of deposit, which may be
412 pledged to the Authority as security.

413 *Sinking Fund*

414 13. A sinking fund is a method of making incremental payments under a letter of credit,
415 insurance guarantee, or cash security. A schedule of payments is established when the

416 financial guarantee is set up. In accordance with the schedule, the Contractor makes
417 payments to the fund until the full amount of the financial guarantee has been reached.

418 **III. HOW TO DEMONSTRATE A SUFFICIENT GUARANTEE**

419 **A. An approved Guarantee is a condition for approval of a Plan of Work**

420 14. Where the Applicant proposes a Guarantee under Section IV(A) of the Standard, the
421 Commission may engage its own expert to assess and validate the Guarantee proposed by
422 the Applicant; the costs incurred by the Commission in doing so would need to be included
423 in the Plan of Work application fee payable by the Contractor.

424 **B. How to determine the form of the Guarantee**

425 15. An Applicant or Contractor may select a variety of forms of guarantees that together
426 aggregate to equal the maximum guarantee required in order to meet the requirements of
427 Regulation 26(2).

428 16. An Applicant or Contractor may use its discretion to determine the form of the
429 Guarantee or combination of forms to suit their specific requirements, provided the form or
430 combination of forms covers the maximum guarantee calculated in accordance with the
431 Closure Plan and is independently validated.

432 **C. How to calculate the Guarantee**

433 17. The Commission does not endorse any single cost estimation tool for calculating the
434 Guarantee.

435 18. An Applicant or Contractor may use any reasonable cost-estimation tool, provided it is
436 suitable to the Contractor's or Applicant's proposed operations and results in a calculation
437 sufficient to cover the EPG scope.

438 19. If an Applicant has not yet obtained approval from the Commission under Regulation
439 7(4), the Applicant may (subject to paragraph 22 of the Standard):

440 (j) estimate the greatest reasonably credible costs, expenses and liabilities that may
441 arise from all Closure Plans across all Plans of Work; and

442 (k) produce one combined form and calculation of financial guarantee for
443 consideration by the Commission.

444 **D. Environmental Performance Guarantee Declaration**

445 20. The Commission has developed an Environmental Performance Guarantee Declaration
446 Form

447 21. Subject to paragraphs 21 and 22 of the Standard and Regulation 7(4), a Declaration may
448 cover non-contiguous Mining Areas included in a Plan of Work.

449 **E. Review process of a Guarantee proposal**

450 22. Should the Commission have any queries with respect to:

451 (l) the independent validator(s) statement;

452 (m) the form proposed by the Applicant; or

453 (n) the calculation of the estimated costs of the EPG Scope,

454 the Commission may seek additional information from the Applicant.
