### 4. Please indicate the rationale for the proposal. [150 word limit]

We support most amendments by the Facilitator (in blue). In addition, we suggest a few amendments (red). It is unclear why this regulation has been changed into the "review" of performance assessments (see heading) while it was originally a regulation on the duty by the contractor to develop and submit such assessments. We support the addition of Para 1d as the ISA should retain its powers to require a Contractor to re-visit an EIS and its conclusions

and to consider how this evaluation feeds into the EMMP, particularly in the event that monitoring shows any EIA finding to be materially flawed. The suggested new Para 1bis aims to introduce some important objectives of the performance review. Further additions shall further clarify and specify the performance assessment, its reporting and utilization by the authority.
