Regulation 52 pertains to the review of the performance assessments of the EMMP. Norway supports clear reporting requirements. However, it is imperative that we avoid duplicate reporting requirements with little added value. The frequency of the reporting must be considered in light of the overall reporting burden on the Contractor, and consequently on the LTC and the Council. Norway’s position is that reporting on the EMMP must be focused on any deviations from the EMMP and how these have been or will be addressed by the Contractor.
