

Intervention #15 - Regulation 28 Maintaining Commercial Production - Delivered on 20/07/2023 by Sergio Cambronero

Thank you Mr. President and good morning delegates,

Regarding Regulation 28 paragraph 3, we strongly support the use of “immediately” instead of “temporarily” in relation to suspending production whenever such reduction or suspension is required to protect the Marine Environment, as this promptly response could be critical to avoid further impacts to the ecosystem services and the biological communities living in the seafloor and the water column.

Thank you.
