### SEA AREAS:

**Polish sea areas: 30560 sq km,**

**Polish Exclusive Economic Zone: 19736 sq km,**

*Area between the outer boundary of the territorial sea and the outer boundary of the Exclusive Economic Zone.*

**Territorial sea: 8783 sq km,**

*Area between the baseline and the outer boundary of the territorial sea.*

### Legend

- Outer boundary of the Exclusive Economic Zone (EEZ)
- Outer boundary of the territorial sea
- Baseline
- Vertex points

The coordinates of the baseline of the Republic of Poland, the outer boundary of the territorial sea of the Republic of Poland are provided in accordance with the Regulation of the Council of Ministers of January 13, 2017, regarding the detailed course of the baseline, the outer boundary of the territorial sea, and the outer boundary of the contiguous zone of the Republic of Poland (Journal of Laws of 2017, item 183).  
 The source coordinates from the Journal of Laws of 2017, item 183 (to geocentric geodetic coordinates in the PL-ETRF89 reference system) were transformed using a seven-parameter Helmert transformation method according to Bursa-Wolf with the use of PCTrans v.4.2.10 calculator.

The coordinates of EEZ (Exclusive Economic Zone) south of Bornholm are provided in accordance with the agreement between the Republic of Poland and the Kingdom of Denmark regarding the delimitation of maritime areas in the Baltic Sea, signed in Brussels on November 19, 2018 (Journal of Laws of 2019, items 567, 1240, 1241).  
 The area of the maritime internal waters was calculated based on data available on the website of the Main Office Geodesy and Cartography - PZGIK data. The data's accuracy is up to October 2017.

Using the "KONWERSJE" program for coordinate transformation:  
 Source coordinates from the Journal of Laws No. 13/1977 item 51 and No. 16/1986 item 85 (except for No. 9) were converted using the Molodensky method.  
 Source coordinates from the Journal of Laws No. 43/1989 item 233 and point 9 from Journal of Laws No. 16/1986 item 85 were converted using the affine method.  
 Source coordinates from the Journal of Laws No. 54/1989 item 323 and No. 74/1990 item 441 were converted according to the formula provided in S-60 Appendix with WGS 72.
