

## **ISA 29th Session, Part II – Reading of the Draft Consolidated Text**

### Oral Statement by the Federal Republic of Germany

Delivered in July 2024

#### **Regulation 92 bis - Publication of environmental data and information**

Germany thanks the proponents behind this regulation. We can fully support this important provision in its current form. We are flexible to where this provision should be placed.

Finally, we believe it is timely to have a discussion on the appropriate definition for the term “environmental data and information”. We furthermore suggest to clarify that this data and information should be made publicly accessible in line with international standards in that regard.
